Sunrise, FL 33325
Dear Board Members:
We are pleased to present the October 1, 2015 Actuarial Valuation for the Town of Davie Police Pension Plan. The purpose of this report is to indicate appropriate contribution levels and to satisfy State requirements. The report is prepared for and at the request of the Board of Trustees.

This report consists of this commentary, detail Tables I through XVI and State Required Exhibit - Table XVII. The Tables contain basic Retirement Plan cost figures plus significant detail on the benefits, liabilities and experience of your Plan.

## Costs for Fiscal Year Beginning October 1, 2015

This Actuarial Valuation develops the required minimum Retirement Plan payment for the fiscal year beginning October 1, 2015 and ending September 30, 2016 under the Florida Protection of Public Employee Retirement Benefits Act and Chapter 185. The minimum payment consists of payment of annual normal cost plus amortization of the unfunded actuarial accrued liability over various periods, and interest, as prescribed by law. We anticipated that member pension contributions will be $\$ 1,125,456$ ( $8.0 \%$ of covered payroll).

The required funding amount for the plan/fiscal year ending September 30, 2016, to be met by the Town and State contributions under Chapter 185 , is $\$ 6,418,604$ or $\mathbf{4 5 . 6 \%}$ of the covered payroll. Please note that Chapter 185 states that employer contributions must be made at least quarterly, and these quarterly amounts must be at least $\$ 1,428,297$.

The anticipated State (Chapter 185) contribution is $\$ 705,416$. The resulting Town required contribution is $\mathbf{\$ 5 , 7 1 3 , 1 8 8}$, or $40.6 \%$ of the covered payroll. If the actual Chapter 185 contribution is below the anticipated $\$ 705,416$, the difference must be made up by additional Town contribution.

The Town contributed its entire contribution for the 10/1/14-9/30/15 plan year in a single payment of $\$ 5,797,600$ on $10 / 22 / 2014$, rather than making contributions throughout the plan year. From the $10 / 1 / 14$ valuation report, the Town's Minimum Funding Requirement (MFR) was $\$ 5,613,748$, but the MFR as of $10 / 21 / 14$ was only $\$ 5,389,887$. Thus the Town generated a prepaid contribution of $\$ 407,713(\$ 5,797,600-\$ 5,389,887)$.

Board of Trustees

## Changes in Plan Provisions, Actuarial Methods or

Assumptions Recognized in this Valuation
The plan provisions remained the same as those recognized in our October 1, 2014 valuation. The plan provisions are outlined in Table XI.

There were no changes in actuarial assumptions and methods from those utilized in the last actuarial valuation. Table XII contains an outline of the assumptions and methods used.

## Comparison of October 1, 2014 and October 1,2015 Valuation Results

Table II provides information of a comparative nature. The left column contains the figures calculated as shown in the October 1, 2014 actuarial valuation results. The right contains the October 1, 2015 valuation results.

A comparison of the columns shows the plan experience for the year. Covered payroll (including overtime pay) increased by approximately $4.9 \%$ while the number of active participants also increased by $3.3 \%$, including nine (9) Tier Two Members. Unfunded actuarial accrued liability increased from $\$ 29,097,388$ to $\$ 30,450,852$, primarily due to the actuarial loss of $\$ 2,304,970$ (shown in Table VIII), mainly from asset losses. The Town cost decreased from 41.9\% to $40.6 \%$ of the covered pension payroll of $\$ 14,068,195$, assuming a Chapter 185 Contribution of $\$ 705,416$. The Town's funding requirement increased as a dollar amount from $\$ 5,613,748$ to 5,713,188.

## Plan Experience

Table XVI provides a summary of certain plan experience during the plan year. The actuarial value of assets return was $5.6 \%$ for the $2014 / 2015$ plan year, which was below the assumed $7.6 \%$. The market value rate of return was $0.5 \%$. Asset return was a major source of actuarial loss. Employee turnover was $48 \%$ lower than the expected turnover during the last plan year, and the most recent three (3) and five (5) year averages were $89 \%$ and $62 \%$ of the expected amounts, respectively. Average salary increase was $2.6 \%$, as compared to the assumed $5.5 \%$. Employee turnover contributed to the actuarial loss and salary increase contributed to the actuarial gain during the plan year.

## Participant Census and Financial Data

Census data for the fiscal year October 1, 2014 through September 30, 2015 was provided by the Town. Supplemental information was also received on retirees and terminations from the plan custodian and the plan administrator. The data was reviewed for consistency and is believed to be reliable.

Board of Trustees
February 8, 2016

## Table VII

## TOWN OF DAVIE POLICE PENSION PLAN

## History of Chapter 185 Contribution Usage

Under the provisions of Florida Statutes Chapter 185, as amended by Chapter 99-1, increments in Chapter 185 contributions over the amount for 1997 must first be used to fund the cost of meeting minimum benefit requirements. After the minimum requirements are met, any additional Chapter 185 contributions received must be used to provide extra benefits. The following is an accounting of the contributions received and the amounts used for compliance since the 1997 plan year.
A. 1997 Chapter 185 contributions received (Base Amount) \$ 280,098
B. Benefit improvements purchased 09/30/2011 to meet Chapter 185 minimum benefits:

Compensation definition to include up to 300 (currently 150) hours per year of overtime pay; minimum service connected disability benefit to be greater of accrued benefit or $42 \%$ of final pay; minimum non-service connected disability benefit to be greater of accrued benefit or $25 \%$ of final pay, payable as 10 year certain and life annuity; and early retirement benefit reduction to be no more than $3.0 \%$ per year.
Cost: One time use of Cumulative Reserve balance of $\$ 182,273+$ annual excess of $\$ 98,030$.

* Interest accumulation begins with the 2002/2003 plan year, and applies to the cumulative excess of actual over base amount from prior plan year. Interest at $8.0 \%$ per year through $9 / 30 / 2009$, and at $7.9 \%$ per year thereafter.
1 A one-time use in the amount of $\$ 261,730$ from the Cumulative Excess also occurred.
2 The Cumulative Excess balance would have been $\$ 579,423$ without the adoption of the inclusion of overtime pay as pension earnings.
3 A one-time use in the amount of $\$ 44,533$ from the Cumulative Excess also occurred.
4 The Cumulative Excess balance would have been $\$ 912,375$ without the adoption of the inclusion of overtime pay as pension earnings.
5 A one-time use in the amount of $\$ 99,737$ from the Cumulative Excess also occurred.
6 A one-time use in the amount of $\$ 182,273$ from the Cumulative Excess also occurred.

Table XI

## TOWN OF DAVIE POLICE PENSION PLAN <br> Outline of Principal Provisions of the Plan

## 1. Effective Date:

May 1, 1976. The most recent plan amendments recognized was Ordinances 2011-18 and 201119. The ordinances were adopted on April 20, 2011.

## 2. Eligibility Requirements:

Effective August 6, 1981, all Police employees in the regular full-time service of the Town are eligible upon the attainment of age 18. Part-time employees who work less than 20 hours per week or five (5) months per year are excluded from participation in the plan.
3. Tier One and Tier Two Participants:

Police Officers hired prior to the creation of the Tier Two plan structure (April 20, 2011) are classified as Tier One Participants, otherwise, they are classified as Tier Two Participants.
4. Benefit Service:

Service of a member from employment date as a certified police officer through termination date measured in years and completed months. A member may buy back up to a total of four (4) years of prior military and sworn police service by paying the true actuarial cost of the increase service.
5. Basic Compensation:

Basic rate of salary paid to an employee including longevity pay and assignment pay but excluding overtime, bonuses and commissions. Payments for unused leave time (vacation, sick leave, etc.) are excluded. Effective October 1, 2001, basic compensation includes up to 70 hours of overtime pay per year. Effective October 1,2003, basic compensation includes up to 120 hours of overtime pay per year. The limit on overtime hours increased to 150 hours effective October 1, 2006 and to 300 hours effective May 1, 2011.
6. Final Average Earnings (FAE):

Final Average Earnings is defined as the higher of (i) average monthly rate of basic compensation during the final thirty-six (36) successive calendar months of Benefit Service, or (ii) average monthly rate of basic compensation of the best five (5) of the last ten (10) years of Benefit Service, preceding actual retirement or termination.
7. Employee Contributions:
$8.0 \%$ of basic compensation.

## Table XI

(continued two)

## 8. Accrued Benefit

## For Tier One Participants:

The monthly accrued benefit is equal to $3.0 \%$ times FAE multiplied by the years and months of Benefit Service for the first 10 years, plus $4.0 \%$ times FAE for the next five (5) years of Benefit Service, plus $5.0 \%$ times FAE for the next five (5) years of Benefit Service, plus $2.0 \%$ of FAE times the next 10 years of Benefit Service. The maximum benefit is limited to $95 \%$ of FAE. However, after 471/2 years of Benefit Service, benefits shall recommence at a rate of $2.0 \%$ of FAE per year.

## For Tier Two Participants:

The monthly accrued benefit is equal to $3.0 \%$ times FAE multiplied by the years and months of Benefit Service for the first 20 years, plus $2.0 \%$ times FAE for each subsequent year of Benefit Service, subject to a maximum benefit of $80 \%$ of FAE. However, after 40 years of Benefit Service, benefits shall recommence at a rate of $2.0 \%$ of FAE per year.
9. Normal Retirement Date:

The first of the month coincident with or next following the earlier of (i) completion of 20 years of Benefit Service or (ii) the attainment of age 55. For a vested terminated member with at least 15 years of Benefit Service, full deferred accrued benefit would be payable on the first of the month coincident with or next following the anniversary of the date that the member would have completed 20 years of Benefit Service.

## 10. Amount of Normal Retirement Income:

The monthly amount of Accrued Benefit, payable in the normal form of payment to a participant on his or her Normal Retirement Date.

## 11. Early Retirement Date:

Attainment of age 50 and completion of 10 years of Benefit Service.

## 12. Amount of Early Retirement Income:

The monthly amount of Accrued Benefit, payable in the normal form of payment to a participant on his Early Retirement Date.
he benefit will be reduced for early payment so that it is actuarially equivalent to the normal retirement benefit. Effective May 1, 2011, the early retirement reduction will be $3.0 \%$ per year for each year prior to Normal Retirement Date.

The participant also has the option of deferring the commencement of his monthly benefit to his Normal Retirement Date, the earlier of the date he would have attained 20 years of Benefit Service (provided he has completed 15 years of actual Benefit Service) or age 55. In such case, there would be no actuarial reduction to his monthly benefit.

Table XI
(continued three)

## 13. Delayed Retirement Date:

A member may continue to work beyond his Normal Retirement Date and retire on any subsequent first day of the month.

## 14. Amount of Delayed Retirement Income:

The monthly amount of Accrued Benefit, payable in the normal form of payment to a participant who retires on his Delayed Retirement Date.

## 15. Benefits on Termination of Service:

In the event of termination of service prior to Normal Retirement Date, for reasons other than death, early retirement or disability, a monthly benefit equal to Accrued Benetit times the vested percentage below will be payable commencing on Normal Retirement Date.

In lieu of this deferred benefit, a participant may elect to receive the return of his employee xontributions.

> Years of
> Benefit Service
> With the Town

Less than 10
10 or more

Vested
Percentage
0\%
$100 \%$
16. Permissive Service Credit Purchases:
a. A vested active participant shall be permitted to purchase permissive service credit in the form of an increased benefit accrual factor, which may be purchased in one percent (1.0\%) increments above the participant's accrued benefit percentage, in an amount not to exceed twenty percent ( $20 \%$ ) of FAE. The maximum amount of benefit accrual will remain at ninety-five percent ( $95 \%$ ) of FAE for Tier One participants and eighty percent ( $80 \%$ ) for Tier Two participants. The purchase cost would be the full actuarial cost of the increased benefit accrual multiplier and must be paid in full prior to the granting of the increased benefits.
b. A vested active participant shall be permitted to purchase permissive service credit expressed as an earlier normal retirement date. Under such proposal, a participant would be able to receive an unreduced normal retirement benefit as early as upon the completion of 15 years of Benefit Service (instead of 20), if a purchase of the maximum of five (5) years of permissive service credit were made. However, the participant would not accrue a higher multiplier, but would be permitted to begin receiving an unreduced retirement benefit with fewer years of actual service. The purchase cost would be the full actuarial cost of the earlier commencement of retirement benefits and must be paid in full prior to the granting of the increased benefits.

## Table XI (continued four)

c. The cost of either purchase may be made either in one lump sum or made in payroll deductions installments for a period not to exceed five (5) years, with $7.0 \%$ per annum interest added, and must be completed prior to commencement of any enhanced benefit.

## 17. Disability Retirement Benefits:

For a member totally and permanently disabled where the disability is service-connected, the monthly benefit shall be equal to the greater of (i) $66-2 / 3 \%$ of such member's base pay at time of disability, less any benefits payable by Federal Old Age, Survivors and Disability Insurance, Worker's Compensation benefits or other disability benefits payable from Broward County or the Town because of disability, age or unemployment. Effective May 1, 2011, the benefit after offset shall in no case be less than the member's Accrued Benefit at date of disability or (ii) forty-two percent ( $42 \%$ ) of FAE payable as a ten year certain and life annuity. The monthly non-service connected benefit is the greater of $\$ 100$ or $1.5 \%$ times FAE multiplied by the number of years of Benefit Service, less any of the offset amounts described above. Effective May 1, 2011, the minimum non-service connected disability benefit shall be the greater of the Accrued Benefit or twenty-five percent ( $25 \%$ ) of FAE, payable as a ten year certain and life annuity. In no event will the service-connected benefit be less than the non-service connected benefit. Benefits shall be payable starting six (6) months after termination of service for disability, and will be payable for life or until recovery.
18. Death Benefits:
a. Prior to retirement: If death is non-service connected or member had no spouse to whom he had been married to for at least one (1) year prior to death, the death benefit shall be the return of accumulated employee contributions plus prior plan benefits, if any. However, if a member had at least 10 years of Benefit Service at the time of death, then his or her beneficiary will be entitled to the benefits otherwise payable to the member at Early or Normal Retirement Date.
If death is service-connected and member has an eligible spouse to whom he had been married to for at least one (1) year prior to death, such spouse shall be entitled to a monthly annuity equal to the greater of (i) $50 \%$ of base pay at his date of death, or (ii) Accrued Benefit payable to the eligible spouse on the date of what would have been the member's Normal Retirement Date. Such pension shall continue to the spouse until the spouse's death, with a guarantee that such benefits will at least equal the accumulated contributions at his date of death. If a member had no eligible spouse but had at least 10 years of Benefit Service at the time of death, then his or her beneficiary will be entitled to the benefits otherwise payable to the member at Early or Normal Retirement Date.
b. After retirement: If a member had elected a joint and survivor or a 10 year certain and life optional form of payment, the adjusted monthly benefit will be continued to the beneficiary until the appropriate annuity ending date. Total benefits payable the member and his beneficiary will not be less than the amount of accumulated contributions at date of retirement.

## Table XI <br> (continued five)

## 19. Normal Form of Retirement Income:

For a married participant, the normal form of retirement income will be monthly payments for life of the member, with benefit continuing to spouse after member's death for one (1) year and $60 \%$ of benefit payable to spouse thereafter. The benefit amount is not reduced due to this form of payment. The participant may also elect to receive the benefit as an unreduced ten year certain and life annuity.

For an unmarried participant, the normal form of payment will be an unreduced ten year certain and life annuity.

## 20. Optional Forms of Retirement Income:

The following optional forms of retirement income may be elected by a member without presenting evidence of good health, if elected at least one year prior to his date of retirement:
Option 1 A single life annuity payable during the lifetime of the participant only.
Option 2 A retirement annuity payable to the member during the joint lifetime of the member and a joint pensioner designated by the member; and following the death of either of them, $50 \%, 66-2 / 3 \%, 75 \%$, or $100 \%$ depending on the retiree's election, of such smaller monthly amount payable to the survivor for the lifetime of the survivor.

Option 3A monthly annuity payable to the member for ten years certain and life thereafter.

## 21. Deferred Retirement Option Plan (DROP):

The DROP is available only if the member makes an irrevocable election to participate after meeting the eligibility for Normal Retirement Benefit. The DROP has a five (5) year maximum participation period, after which the employee is deemed separated from the Town. In no event can a member who enters the DROP exceed 30 years of total Benefit Service plus years of DROP participation. If the member dies or becomes disabled during the DROP period, the member will have presumed to have retired on a normal retirement on the day prior to disability or death.

## 22. Cost of Living Adjustments (COLA):

An annual COLA will be provided to retirees and beneficiaries. The amount of the COLA will be $2.0 \%$ per year. For recipients who retired prior to October 1, 1997, the monthly benefit after the yearly COLA will not exceed $115 \%$ of the original monthly benefit prior to any COLA. For post October 1, 1997 retirees, the limit for future monthly benefits after COLA will be $130 \%$ of the original benefit amounts prior to any COLA. The first annual COLA will commence on the fifth anniversary of retirement, but no earlier than November 1, 2004.

## 23. Changes from October 1, 2014 Valuation:

None.

Table XII

## TOWN OF DAVIE POLICE PENSION PLAN

## Actuarial Assumptions and Actuarial Cost Methods

1. Mortality:

For healthy participants, the RP-2000 Mortality Table was used with separate rates for males and females.

For disabled participants, the 1985 Pension Disability Table was used with separate rates for males and females.

No provision was made for future mortality improvement.
$50 \%$ of all pre-retirement deaths are assumed to be duty related.
2. Interest to be Earned by Fund:
$7.60 \%$, compounded annually, net of investment expenses.
3. Allowances for Expenses or Contingencies:

Estimated by net of investment fees paid during previous year.
4. Employee Withdrawal Rates:

Withdrawal rates were used in accordance with tables per the following illustrative example:

| Age | Withdrawal Rates Per 100 Employees |  |
| :---: | :---: | :---: |
|  | Male | Female |
| 20 | 8.4 | 14.0 |
| 25 | 5.6 | 8.4 |
| 30 | 3.9 | 5.6 |
| 35 | 2.8 | 3.9 |
| 40 | 1.7 | 2.8 |
| 45 | 1.1 | 1.7 |
| 50 | 0.2 | 1.1 |
| 55 \& over | 0.0 | 0.0 |

## 5. Assumptions on Pensionable Overtime Hours

Each member is assumed to continue to work the same number of overtim: hours as in the most recent plan year, subject to the 300 hours maximum, for each future year.

Table XII (continued two)

## 6. Disability Rates:

The 1985 Disability Study - Class 1 with separate male and female rates were used. $75 \%$ of disabilities assumed to be service incurred, $25 \%$ assumed to be non-service incurred.

## 7. Salary Increase Factors:

Current salaries were assumed to increase at a rate of $5.5 \%$ per year until retirement.
8. Rates of Retirement:

The following are the retirement rates assumed for the participants eligible for retirement:

| Participants with 20 or more <br> years of Benefit Service |  | Participants with less than <br> 20 years of Benefit Service |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Years of | Percentage |  |  | Percentage |
| Service | Retiring |  | Age | Retirement |
| 20 | $65 \%$ |  | $50-54$ | $25 \%$ |
| $21-24$ | $50 \%$ |  | $55-59$ | $50 \%$ |
| 25 and over | $100 \%$ |  | 60 and over | $100 \%$ |

However, active participants eligible for retirement that have less than 20 years of Benefit Service as of the valuation date are assumed to have a minimum of one year future service.

## 9. Asset Valuation Method:

The actuarial value of assets is determined by smoothing the differences between actual investment earnings and assumed investment return over three (3) years. This method was adopted effective October 1, 2007 with no phase-in. The resulting value would then be limited to between $80 \%$ and $120 \%$ of market value.

## 10. Actuarial Cost Method:

Normal Retirement, Termination, Disability and Pre-Retirement Death Benefits: Entry-AgeActuarial Cost Method.

Under this method the normal cost for each active employee is the amount which is calculated to be a level percentage of pay that would be required annually from his date of hire to his retirement age to fund his estimated benefits, assuming the plan had always been in effect. The normal cost for the plan is the sum of the individual normal costs for all active participants. The actuarial accrued liability as of any valuation date for each active employee or inactive employee who is eligible to receive benefits under the plan is the excess of the actuarial present value of estimated future benefits over the actuarial present value of current and future normal costs. The unfunded actuarial accrued liability as of any valuation date is the excess of the actuarial accrued liability over the actuarial value of assets of the plan.

Table XII
(continued three)
11. Marriage Assumptions:
$100 \%$ of active participants were assumed married, with husbands three (3) years older than wives.
12. Valuation of Normal Form of Payment:

The normal form of payment is valued as an unreduced joint and $60 \%$ survivor annuity benefit for married members. For unmarried members, the normal form of payment is valued as a ten year certain and life annuity.
13. Changes from October 1, 2014 Actuarial Valuation

None.

Total actuarial present value of accumulated plan benefits
3. Miscellaneous (refund unpaid)
4. Total actuarial present value of future expected benefit payments
5. Actuarial accrued liabilities
6. Unfunded actuarial accrued liabilities
\$ 124,286,530

5,221,742

## E. Statement of Change in Accumulated Plan Benefits

1. Actuarial present value of accumulated plan benefits as of October 1, 2014
\$ 120,222,883
2. Increase (decrease) during year attributable to:
a. Plan amendment 0
b. Actuarial assumptions and methods changes 0
c. Benefits paid and contribution refunds $\quad(4,904,403)$
d. DROP benefits credited $(991,985)$
e. Other, including benefits accumulated and increase for interest due to decrease in the discount period
f. Net increase (decrease)

15,181,777
3. Actuarial present value of accumulated plan benefits as of October 1, 2015

Table XVII (continued three)

## F. Pension Cost

1. Total normal cost including expenses
2. Expected member contribution
3. Item 2. as percentage of payroll
4. Net employer normal cost
5. Payment required to amortize unfunded liability

10/1/2014

Total employer required contribution (including interest)
7. Item 6. as a percentage of payroll
8. State contributions
9. Item 8. as a percentage of payroll
10. Net amount payable by Town
14. Item 10. as a percentage of payroll

| TOTAL: |  | \$ 30,450,852 | \$ 2,879,198 |

## Table XVII (continued five)

This actuarial valuation and/or cost determination was prepared and completed by me or under my direct supervision, and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate, and in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Part VII, Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.
